Company Description

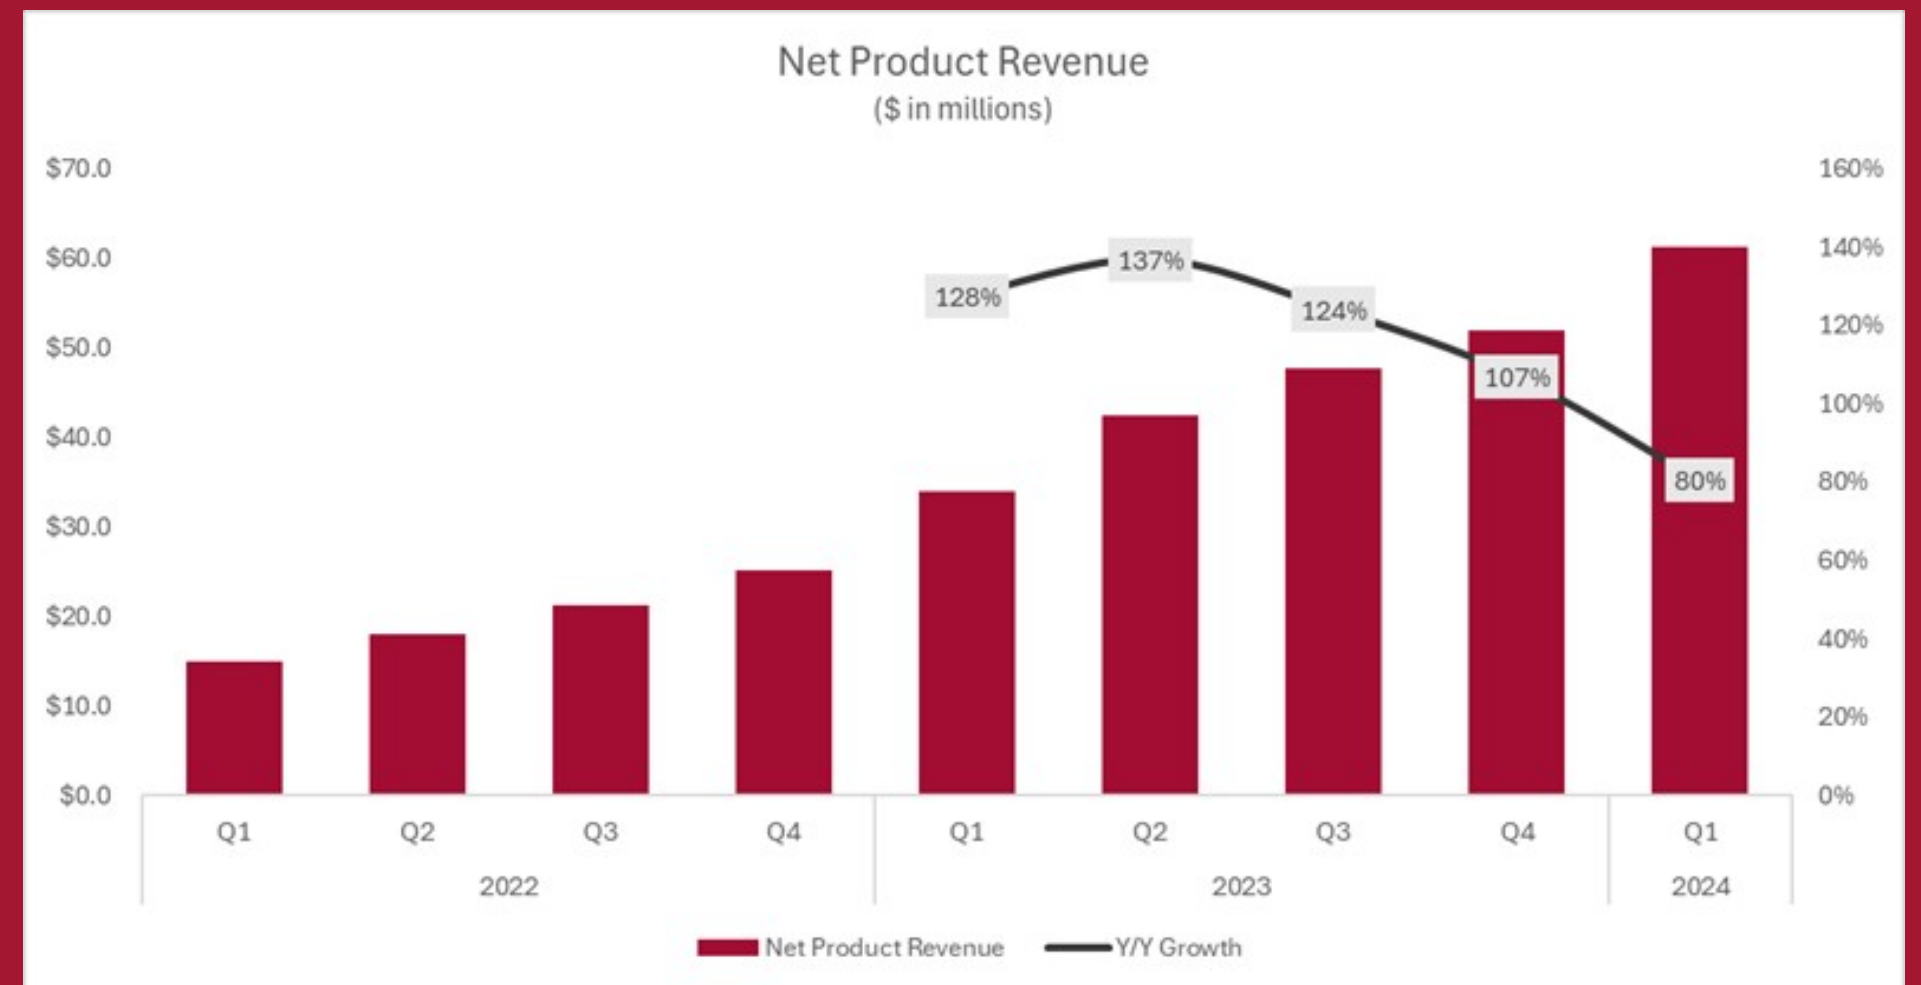

Company Overview

- Founded in 1998 by Dr. Waleed Hassanein
- Market Cap: **\$5.05 Billion**
- 2025E Revenue: **\$595 million**
- Employees: **500+ globally**
- HQ: Andover, MA, USA
 - Active in North America, Europe, APAC, and expanding
- Business Model:
 - **Organ Care System (OCS)**
 - **Logistics & Service**
 - (transport, storage, maintenance)
 - **National OCS Program**

Historical Growth

- Compounded Annual Growth (CAGR) of **17.6%**
- FY 2023 revenue: **\$241.6M**
- FY 2024: \$441.5M (83% YoY growth)
- Normothermic tech: 16%+ CAGR

SWOT Analysis

Strengths:

- FDA-approved multi-organ OCS
- Recurring consumables revenue
- Vertically integrated logistics

Opportunities:

- Global transplant growth
- National OCS expansion
- Rising Transplant Volumes

Weaknesses:

- Single core platform
- Complex regulatory logistics

Threats:

- Regulatory & supply risks
- Competing technologies

Industry Analysis

Competition

Medtech transplant logistics sector 2024: \$2B–\$3B, 15–20% industry CAGR (Grand View Research, Mordor Intelligence)

OCS (Organ Care System) platforms showing high adoption with rapid market share capture

Key competitors: OrganOx, XVIVO Perfusion, Paragonix; no direct multi-organ competitors

Large, underpenetrated international opportunity: <20% of European hospitals use OCS; Asia-Pac emerging

U.S. leads with OCS National Program as central model

0

**Degree of Rivalry
- Moderate**

- Only FDA-approved portable multi-organ system
- High switching costs
- Low purchase volume - strategic importance

10

**Threat of Substitutes -
Low**

- Specialized, regulated components
- Hard and costly to switch suppliers
- Vertical integration reduces dependence

20

**Threat of New Entry -
Extremely Low**

- Major regulatory and capital barriers
- Patented, differentiated technology
- High R&D and fixed costs deter entrants

304

**Power of Suppliers -
Moderate**

- Cold storage cheaper but lower performance
- EVP competitors exist but do not match OCS portability or multi-organ capability
- No substitute matches OCS clinical outcomes

05

Power of Buyers - Low

- Competitors lack FDA approval
- Strong clinical differentiation
- Price pressure vs. cold storage

Investment Thesis:

TransMedics is a:

BUY

Due to its strong returns from OCS adoption across organs, a vertically integrated logistics network, and barriers to entry stemming from intellectual property, all of which support long-term growth.

Growth Drivers

- Rising transplant demand driven by aging populations and higher rates of chronic disease
- Tailwinds from expanded FDA approvals and reimbursement support
- Shift from cold storage to machine perfusion (OCS) as outcomes improve
- Advancing perfusion technology increasing clinical confidence
- Competitive innovation pushing the market toward higher-performance systems

Risks & Mitigants

Platform Dependency

Risk

The company relies mostly on its Organ Care System (OCS). If there are any problems with approvals or quality, sales could be hurt.

Mitigant

They have versions of OCS for different organs and continuously update the technology to meet regulatory standards.

Supply Chain and Logistics Challenges

Risk

Moving organs quickly and safely is complex. If transportation or supplies are delayed, it could disrupt services.

Mitigant

The company invests in multiple suppliers and owns the whole logistics network to keep things running smoothly.

Technology & Medical Issues

Risk

Any device failure or clinical problems could damage their reputation and slow growth.

Mitigant

They work closely with hospitals, perform rigorous quality checks, and quickly fix any issues that arise.

Regulation and Payment Changes

Risk

Changes in rules or insurance payments could affect sales or cause slow product launches.

Mitigant

The company builds strong clinical evidence through trials, stays engaged with regulators, and spreads its business globally to reduce risk.
